Cumulative Subject index of volume 123

Absorption; Anthocyanins; Flavonoids; Antioxidant; Pharmacokinetics; Elderly; Elderberry 123, 997

Accelerated senescence; Murine leukemia virus; Mouse strain 123, 575

Acetylcholine; Cerebral arteries; Immunohistochemistry; Aging; Fisher 344 rats 123, 529

Acetylcholine-deficiency; Pathological glia activation; Alzheimer's dementia; Therapeutic interference; Oxidative damage; Amyloid toxicity; In vitro studies 123, 47

Acetylcholinesterase; Parkinson's disease; Alzheimer's disease; Monoamine oxidase A and B; Inhibitors; Propargylamines; Apoptosis; Bcl-2; Superoxide dismutase (SOD); Rasagiline; TV3326; Neuroprotection 123, 1081

Adaptation; Strehler and Mildvan model; Mortality; Gompertz curve 123, 637

Adaptive response; Aging; Oxidative stress; DAF-16 transcription factor; Life span extension 123, 1579

Adipogenic differentiation; Skeletal muscle; Aging; Myoblasts; Myogenic differentiation 123, 649

ADP-ribosylation; Eucaryotic elongation factor-2; Ageing heart; Rat cardiac myocytes; Phosphorylated eEF-2; One-dimensional isoelectric focusing 123, 1305

ADP-ribosylation processes; Astroglial cell cultures; Development; Aging; Growth factors 123, 511

Adrenal gland; Transcription factors; Ageing; Oxidative stress; Steroids; Bacterial lipopolysaccharide 123, 1211

Adult neurogenesis; Dentate gyrus; MAM; Granule cell number; Newborn cell survival 123, 1341

Age-dependent disorders; SAM strains of mice; Senescence acceleration; Hyperoxidative status; Mitochondrial dysfunctions 123, 1553

Aged myocardial cells; Apoptosis; Bcl-2 family proteins 123, 341

Age effect; Glutathione S-transferase; Mouse liver; Hepatic response capability; Protein free diet 123, 1617

Ageing; Alzheimer's disease; Neurofibrillary tangles; Senile plaques; Amyloid 123, 811

Ageing; Amyloidosis; Protein folding disease; Transmission 123, 1625

Ageing; Apoptosis; Caloric restriction; Cancer; Forkhead transcriptional factor; Insulin/IGF-I; Neurodegenerative diseases; Oxidative stress 123, 245

Ageing; Attractor; Fibroblast; Hormesis; Senescence; Stress; Thermodynamics 123, 937

Ageing; *Caenorhabditis elegans*; Clk; Metabolism; Antioxidant defense 123, 1447

Ageing; *Caenorhabditis elegans*; Oxidative stress; Protein turnover; Translational regulation 123, 215

Ageing; Caspases; Apoptosis; Longevity; mRNA 123, 1133

- Ageing;** CD28; CD152; CD8; Interleukin 2; SE-NIEUR Protocol 123, 1283
- Ageing;** *C. elegans*; Oxidative stress; Hormonal regulation 123, 765
- Ageing;** Dolichol; Cholesterol; 3-Hydroxy-3-methyl-glutaryl CoA reductase; Caloric restriction; Rat liver 123, 1183
- Ageing;** Frailty index; Rate of mortality; Sex differences; Power-law relationships; Scale invariance 123, 1457
- Ageing heart;** Eucaryotic elongation factor-2; Rat cardiac myocytes; Phosphorylated eEF-2; ADP-ribosylation; One-dimensional isoelectric focusing 123, 1305
- Ageing;** Hippocampus; Muscarinic receptors; Autoradiography; Fischer 344 rats 123, 521
- Ageing;** Lymphocyte subsets; HPA axis; DHEA; T cell expansions 123, 1477
- Ageing;** Methods; Metabolism; Metabolic rate; Life span; *C. elegans* 123, 105
- Ageing;** Methylation; Cancer; *hMLH1*; Epigenetic gene silencing; Microsatellite instability 123, 1649
- Ageing;** Mutation; Mitochondrion; Gene expression; Telomere 123, 791
- Ageing phenotype;** CD4⁺ lymphocytes; Mice; Peripheral blood; FACS 123, 145
- Ageing population;** Social policies; Demography; Older people; Health and Care services; Inter-generational links 123, 729
- Ageing;** Prohibitin; *Saccharomyces cerevisiae*; Yeast; Oxidative stress; Mitochondrial proteins 123, 287
- Ageing;** Skin; Photodamage; Sun-damage; Senescence; AP-1; Extra-cellular matrix; Metalloproteinase 123, 801
- Ageing;** Snell dwarf; *Pit 1*; Life span; Gene 123, 121
- Ageing;** Th1; Th2; Granulomas; Chemokines; Cytokines 123, 313
- Ageing;** Transcription factors; Oxidative stress; Steroids; Adrenal gland; Bacterial lipopolysaccharide 123, 1211
- Ageing;** Werner syndrome; Genomic instability; Reactive oxygen species; Antioxidants; DNA excision repair 123, 899
- Ageing;** Zinc; Metallothioneins; Inflammation; Thyroid-thymus axis; Corticosterone; Thymus grafts; PTU; Stress; MTs transgenic mice; Biological clock; Survival 123, 675
- Age-related dysregulation;** Plasma redox state; Amino acid homeostasis; Aging 123, 1269
- AGEs;** Aging; Glucagon receptor; cAMP; Gene expression; Liver; WAG/Rij rats 123, 427
- Aging;** Adaptive response; Oxidative stress; DAF-16 transcription factor; Life span extension 123, 1579
- Aging;** Anti-oxidant; Butylated hydroxytoluene; Rejuvenation; Tunicata 123, 1203
- Aging;** Astroglial cell cultures; Development; Growth factors; ADP-ribosylation processes 123, 511
- Aging;** *Caenorhabditis elegans*; Lifespan; Telomeres; *clk-2*; *rad-5* 123, 869
- Aging;** Caloric restriction; Gene expression; DNA microarrays; Muscle; Brain 123, 177
- Aging;** Cerebral arteries; Acetylcholine; Immunohistochemistry; Fisher 344 rats 123, 529
- Aging;** CTLA-4; Anergy; Immune activation; CD28 123, 1419
- Aging;** Database; Gene; Intervention; Science of aging knowledge environment 123, 1115
- Aging;** Dendritic cells; Frail elderly; Cytokines 123, 955
- Aging;** DNA damage; Alkylating agents; Apoptosis; Cancer; Mitogen-activated protein kinase (MAPK) 123, 881

Aging; DNA methylation; ITGAL; LFA-1; T lymphocytes **123**, 1257

Aging; DNA methylation; T cells **123**, 1487

Aging; DNA repair; Oxidative damage; 8-Oxo-2'-deoxyguanosine; DNA polymerase; PCNA **123**, 1521

Aging; Dopamine receptors; Mesenteric vasculature; Receptor immunohistochemistry; Anti-receptor protein antibodies; Fischer 344 rats **123**, 537

Aging; Estradiol; ER α ; ER β ; Female **123**, 593

Aging; Free radicals; Protein carbonyls; Malondialdehyde; Protein damage; Carbonyl stress; Fatty acids **123**, 1437

Aging; Gender; K_{ATP} channels; Cardioprotection; Heart **123**, 695

Aging; Genome rearrangements; LacZ reporter genes; Nuclear architecture; Mutations **123**, 907

Aging; Glucagon receptor; cAMP; AGEs; Gene expression; Liver; WAG/Rij rats **123**, 427

Aging; Hypothalamic-pituitary-adrenal axis; *Papio hamadryas*; *Macaca mulatta* **123**, 1191

Aging; Influenza virus; Cytotoxicity; Memory; Mice **123**, 1167

Aging; Lipofuscin; Retina; Retinoids **123**, 831

Aging; Liver; Fibrosis; Matrix metalloproteinases **123**, 413

Aging; Melatonin; Free radicals; Nitrogen-based radicals; Oxygen-based radicals **123**, 1007

Aging; Mitochondrial DNA; Skin fibroblast **123**, 155

Aging; Mutation; Transgenic mouse; Knockout mouse **123**, 1543

Aging; Osteoclast; Human; Bone marrow; Bone mineral density **123**, 1321

Aging; Oxidative stress; T-cell immunity; ZAP-70; Protein tyrosine phosphorylation **123**, 297

Aging; 60% oxygen inhalation; Survival; Catalase; Glutathione peroxidase; Superoxide dismutase; mRNA; Oxidative stress **123**, 1295

Aging; Peroxisome-proliferator activated receptors; Retinoid X receptors; Peroxisomal β -oxidation; Apoptosis **123**, 1469

Aging; Plasma redox state; Amino acid homeostasis; Age-related dysregulation **123**, 1269

Aging; p38 MAPK; MKK3; 3-Nitropropionic acid; Oxidative stress; Mouse liver **123**, 1423

Aging; Reactive oxygen species; Antioxidant; Energy restriction **123**, 1597

Aging; Redox-sensitive transcription factor; NF- κ B; AP-1; HIF-1; Calorie restriction **123**, 1589

Aging research; *Caenorhabditis elegans*; Nematode life cycle **123**, 261

Aging; Senescent; Apoptosis; Lung; Endothelium **123**, 613

Aging; Senescent decline; Protein damage; Protein turnover; Protein oxidation; Protein damage catastrophe **123**, 207

Aging; Skeletal muscle; Myoblasts; Myogenic differentiation; Adipogenic differentiation **123**, 649

Aging; Stem cell; Transplantation; Epithelium; Mammary gland; Cell lineage; Development **123**, 1505

Aging; T cell proliferation; CD28; Cytokines; IL-12; IL-15 **123**, 1389

Aging; T cells; Thymic involution; Recombinant inbred mice; Quantitative trait loci **123**, 1145

Aging; Telomere length; Telomerase; Keratinocytes **123**, 585

Aging; Variance component analysis; Non-human primates; Genetics **123**, 1461

Aging; Vascular tone; Hypoxia; Reoxygenation; Aorta; Rat **123**, 275

- Aging;** Yeast; Heterochromatin; *SIR2*; *Caenorhabditis elegans*; Caloric restriction **123**, 857
- Aging and longevity genes;** Single nucleotide polymorphism; Direct association studies; BRCA1; Two-dimensional gene scanning **123**, 195
- Akt;** Antioxidant; Brain-derived neurotrophic factor; Glucose; Insulin; Stress **123**, 947
- AKT;** Insulin signaling; Insulin receptor; IRS-1; PI3K; Snell dwarf; Liver **123**, 1245
- Alkylating agents;** DNA damage; Apoptosis; Cancer; Aging; Mitogen-activated protein kinase (MAPK) **123**, 881
- Alzheimer disease;** Cell cycle; Pathogenesis **123**, 3
- Alzheimer disease;** MAPK mitogen; Oxidative stress **123**, 39
- Alzheimer's dementia;** Pathological glia activation; Therapeutic interference; Oxidative damage; Amyloid toxicity; Acetylcholine-deficiency; In vitro studies **123**, 47
- Alzheimer's disease;** Ageing; Neurofibrillary tangles; Senile plaques; Amyloid **123**, 811
- Alzheimer's disease;** Parkinson's disease; Monoamine oxidase A and B; Acetylcholinesterase; Inhibitors; Propargylamines; Apoptosis; Bcl-2; Superoxide dismutase (SOD); Rasagiline; TV3326; Neuroprotection **123**, 1081
- Alzheimer's disease;** Transcription factor; Cell cycle; Retinoblastoma protein; E2F1 **123**, 11
- Amino acid homeostasis;** Plasma redox state; Age-related dysregulation; Aging **123**, 1269
- Amyloid;** Alzheimer's disease; Ageing; Neurofibrillary tangles; Senile plaques **123**, 811
- Amyloidosis;** Protein folding disease; Ageing; Transmission **123**, 1625
- Amyloid toxicity;** Pathological glia activation; Alzheimer's dementia; Therapeutic interference; Oxidative damage; Acetylcholine-deficiency; In vitro studies **123**, 47
- Androgens;** Thymus; T cell differentiation; Castration **123**, 401
- Anergy;** CTLA-4; Aging; Immune activation; CD28 **123**, 1419
- Anthocyanins;** Flavonoids; Antioxidant; Pharmacokinetics; Absorption; Elderly; Elderberry **123**, 997
- Anti-aging nitrones;** Neuro-inflammation; α -phenyl-tert-butyl nitron; Reactive oxygen species; Oxygen free radicals **123**, 1021
- Anti-aging steroid;** Dehydroepiandrosterone sulfate; Mechanism of action of DHEA **123**, 1101
- Anti-oxidant;** Aging; Butylated hydroxytoluene; Rejuvenation; Tunicata **123**, 1203
- Antioxidant;** Akt; Brain-derived neurotrophic factor; Glucose; Insulin; Stress **123**, 947
- Antioxidant;** Anthocyanins; Flavonoids; Pharmacokinetics; Absorption; Elderly; Elderberry **123**, 997
- Antioxidant;** Reactive oxygen species; Aging; Energy restriction **123**, 1597
- Antioxidant defense;** *Caenorhabditis elegans*; Ageing; Clk; Metabolism **123**, 1447
- Antioxidants;** Ageing; Werner syndrome; Genomic instability; Reactive oxygen species; DNA excision repair **123**, 899
- Antioxidants;** Kidney disease; Mesangial cell; Glomerular sclerosis **123**, 1041
- Anti-receptor protein antibodies;** Dopamine receptors; Mesenteric vasculature; Aging; Receptor immunohistochemistry; Fischer 344 rats **123**, 537
- Aorta;** Aging; Vascular tone; Hypoxia; Reoxygenation; Rat **123**, 275
- Aorta;** Growth hormone; Collagen; Elastin; Mechanics; Rats **123**, 627
- AP-1;** Redox-sensitive transcription factor; NF- κ B; HIF-1; Aging; Calorie restriction **123**, 1589

AP-1; Skin; Photodamage; Sun-damage; Senescence; Ageing; Extra-cellular matrix; Metalloproteinase **123**, 801

Apical dendrite; Cluster; Cerebral cortex; Cortical column **123**, 473

Apolipoprotein E; Atherosclerosis; Mouse; Dietary restriction **123**, 1121

Apoptosis; Aged myocardial cells; Bcl-2 family proteins **123**, 341

Apoptosis; Ageing; Caloric restriction; Cancer; Forkhead transcriptional factor; Insulin/IGF-I; Neurodegenerative diseases; Oxidative stress **123**, 245

Apoptosis; Caspases; Ageing; Longevity; mRNA **123**, 1133

Apoptosis; DNA damage; Alkylating agents; Cancer; Aging; Mitogen-activated protein kinase (MAPK) **123**, 881

Apoptosis; Parkinson's disease; Alzheimer's disease; Monoamine oxidase A and B; Acetylcholinesterase; Inhibitors; Propargylamines; Bcl-2; Superoxide dismutase (SOD); Rasagiline; TV3326; Neuroprotection **123**, 1081

Apoptosis; Peroxisome-proliferator activated receptors; Retinoid X receptors; Aging; Peroxisomal β -oxidation **123**, 1469

Apoptosis; Senescent; Aging; Lung; Endothelium **123**, 613

Argininosuccinate lyase; Citrulline; Argininosuccinate synthetase; Phosphate-dependent glutaminase; Carbamyl phosphate synthetase-1; Ornithine transcarbamylase **123**, 1159

Argininosuccinate synthetase; Citrulline; Argininosuccinate lyase; Phosphate-dependent glutaminase; Carbamyl phosphate synthetase-1; Ornithine transcarbamylase **123**, 1159

Aromatase; Osteoblast; Osteoporosis; 1,25-Dihydroxyvitamin D3; Dehydroepiandrosterone; Estrogen **123**, 1107

Arteriosclerosis; Atherosclerosis; Human; Hypertension; Nephrosclerosis **123**, 327

Artificial selection; *Drosophila*; Lifespan; QTL; Pleiotropy; Sex-specificity; Recombinant inbred lines **123**, 81

Astrocytes; Cell culture; Co-culture; Metabolic impairment; Microglia; Neurons; Thiamine deficiency **123**, 21

Astrocytes; GFAP; Hippocampus; Development; Male; Female; Morphometry; Rat **123**, 481

Astrocytes; GFAP; S100B; Glutamate uptake; Guanosine; Oxidative stress **123**, 1333

Astroglial cell cultures; Development; Aging; Growth factors; ADP-ribosylation processes **123**, 511

Atherosclerosis; Arteriosclerosis; Human; Hypertension; Nephrosclerosis **123**, 327

Atherosclerosis; Mouse; Apolipoprotein E; Dietary restriction **123**, 1121

Attractor; Ageing; Fibroblast; Hormesis; Senescence; Stress; Thermodynamics **123**, 937

Autoimmunity; Memory immunity; Immune tolerance **123**, 975

Autoradiography; Hippocampus; Muscarinic receptors; Ageing; Fischer 344 rats **123**, 521

Bacterial lipopolysaccharide; Transcription factors; Ageing; Oxidative stress; Steroids; Adrenal gland **123**, 1211

Bcl-2 family proteins; Aged myocardial cells; Apoptosis **123**, 341

Bcl-2; Parkinson's disease; Alzheimer's disease; Monoamine oxidase A and B; Acetylcholinesterase; Inhibitors; Propargylamines; Apoptosis; Superoxide dismutase (SOD); Rasagiline; TV3326; Neuroprotection **123**, 1081

Biological clock; Zinc; Metallothioneins; Ageing; Inflammation; Thyroid-thymus axis; Corticosterone; Thymus grafts; PTU; Stress; MTs transgenic mice; Survival **123**, 675

Bone marrow; Osteoclast; Human; Aging; Bone mineral density **123**, 1321

Bone mineral density; Osteoclast; Human; Bone marrow; Aging **123**, 1321

Brain; Caloric restriction; Aging; Gene expression; DNA microarrays; Muscle **123**, 177

- Brain;** Dystrophin; Utrophin; Human fetus; Neuronal cultures **123**, 455
- Brain-derived neurotrophic factor;** Akt; Antioxidant; Glucose; Insulin; Stress **123**, 947
- BRCA1;** Aging and longevity genes; Single nucleotide polymorphism; Direct association studies; Two-dimensional gene scanning **123**, 195
- Butylated hydroxytoluene;** Aging; Anti-oxidant; Rejuvenation; Tunicata **123**, 1203
- Cabric restriction;** Immunological restoration; Vitamin E; Cyclophosphamide; Japanese herbal medicine; Vaccine; Grafting of cells and tissues **123**, 1055
- Caenorhabditis elegans;** Ageing; Clk; Metabolism; Antioxidant defense **123**, 1447
- Caenorhabditis elegans;** Ageing; Oxidative stress; Protein turnover; Translational regulation **123**, 215
- Caenorhabditis elegans;** Aging; Yeast; Heterochromatin; *SIR2*; Caloric restriction **123**, 857
- Caenorhabditis elegans;** Lifespan; Telomeres; *clk-2*; *rad-5*; Aging **123**, 869
- Caenorhabditis elegans;** Nematode life cycle; Aging research **123**, 261
- Calcium release-activated channel;** Calcium signaling; Mitochondrial permeability transition pore; Immunosenescence; Membrane potential; Reactive oxygen species **123**, 707
- Calcium signaling;** Calcium release-activated channel; Mitochondrial permeability transition pore; Immunosenescence; Membrane potential; Reactive oxygen species **123**, 707
- Caloric restriction;** Ageing; Apoptosis; Cancer; Forkhead transcriptional factor; Insulin/IGF-I; Neurodegenerative diseases; Oxidative stress **123**, 245
- Caloric restriction;** Aging; Gene expression; DNA microarrays; Muscle; Brain **123**, 177
- Caloric restriction;** Aging; Yeast; Heterochromatin; *SIR2*; *Caenorhabditis elegans* **123**, 857
- Caloric restriction;** Dolichol; Cholesterol; 3-Hydroxy-3-methyl-glutaryl CoA reductase; Ageing; Rat liver **123**, 1183
- Caloric restriction;** Food restriction; Contractility; Cardiac efficiency; Cardiac metabolism; Isolated heart **123**, 1375
- Caloric restriction;** Ischemia; Preconditioning **123**, 1411
- Caloric restriction;** Redox-sensitive transcription factor; NF- κ B; AP-1; HIF-1; Aging **123**, 1589
- cAMP;** Aging; Glucagon receptor; AGEs; Gene expression; Liver; WAG/Rij rats **123**, 427
- Cancer;** Ageing; Apoptosis; Caloric restriction; Forkhead transcriptional factor; Insulin/IGF-I; Neurodegenerative diseases; Oxidative stress **123**, 245
- Cancer;** DNA damage; Alkylating agents; Apoptosis; Aging; Mitogen-activated protein kinase (MAPK) **123**, 881
- Cancer;** Methylation; Ageing; *hMLH1*; Epigenetic gene silencing; Microsatellite instability **123**, 1649
- Cancer;** Senescence; Telomerase; Telomere; Cell cycle inhibition; p53; HeLa **123**, 1681
- Carbamyl phosphate synthetase-1;** Citrulline; Argininosuccinate synthetase; Argininosuccinate lyase; Phosphate-dependent glutaminase; Ornithine transcarbamylase **123**, 1159
- Carbon source;** *Saccharomyces cerevisiae*; Replicative ageing; Catalase; Glutathione **123**, 365
- Carbonyl stress;** Aging; Free radicals; Protein carbonyls; Malondialdehyde; Protein damage; Fatty acids **123**, 1437
- Cardiac efficiency;** Food restriction; Caloric restriction; Contractility; Cardiac metabolism; Isolated heart **123**, 1375
- Cardiac metabolism;** Food restriction; Caloric restriction; Contractility; Cardiac efficiency; Isolated heart **123**, 1375

- Cardioprotection;** Aging; Gender; K_{ATP} channels; Heart **123**, 695
- Caspases;** Apoptosis; Ageing; Longevity; mRNA **123**, 1133
- Castration;** Thymus; T cell differentiation; Androgens **123**, 401
- Catalase;** Aging; 60% oxygen inhalation; Survival; Glutathione peroxidase; Superoxide dismutase; mRNA; Oxidative stress **123**, 1295
- Catalase;** *Saccharomyces cerevisiae*; Replicative ageing; Glutathione; Carbon source **123**, 365
- Catalase;** Superoxide dismutase; Life span prolongation; Cytokines **123**, 1087
- Caveolins;** Receptor-mediated endocytosis; Clathrin-dependent endocytosis **123**, 917
- CD28;** Aging; T cell proliferation; Cytokines; IL-12; IL-15 **123**, 1389
- CD8;** CD28; CD152; Interleukin 2; Ageing; SENIEUR Protocol **123**, 1283
- CD28;** CD152; CD8; Interleukin 2; Ageing; SENIEUR Protocol **123**, 1283
- CD28;** CTLA-4; Aging; Anergy; Immune activation **123**, 1419
- CD152;** CD28; CD8; Interleukin 2; Ageing; SENIEUR Protocol **123**, 1283
- CD69 expression;** Immunosenescence; Neurodegeneration; T lymphocyte subsets; Tyrosine phosphorylation; Cytokine expression; Proliferation **123**, 375
- CD4⁺ lymphocytes;** Ageing phenotype; Mice; Peripheral blood; FACS **123**, 145
- C. elegans;** Ageing; Oxidative stress; Hormonal regulation **123**, 765
- C. elegans;** Methods; Metabolism; Metabolic rate; Ageing; Life span **123**, 105
- Cell culture;** Astrocytes; Co-culture; Metabolic impairment; Microglia; Neurons; Thiamine deficiency **123**, 21
- Cell cycle;** Alzheimer disease; Pathogenesis **123**, 3
- Cell cycle;** Transcription factor; Alzheimer's disease; Retinoblastoma protein; E2F1 **123**, 11
- Cell cycle inhibition;** Senescence; Cancer; Telomerase; Telomere; p53; HeLa **123**, 1681
- Cell fusion;** Cellular senescence; Complementa-tion; Chromosome transfer; MORF4; Tumor suppression **123**, 927
- Cell lineage;** Aging; Stem cell; Transplantation; Epithelium; Mammary gland; Develop-ment **123**, 1505
- Cell lines;** EBV; Extremely old; Longevity **123**, 1415
- Cell proliferation;** Dietary restriction; Percent S-phase cells; Proliferating cell nuclear antigen la-beling; Rat **123**, 391
- Cellular senescence;** Cell fusion; Complementa-tion; Chromosome transfer; MORF4; Tumor suppression **123**, 927
- Centenarian;** Oldest old; Longevity; Genetics; Longevity-enabling gene; Demographic selec-tion **123**, 231
- Cerebral arteries;** Acetylcholine; Immunohisto-chemistry; Aging; Fisher 344 rats **123**, 529
- Cerebral cortex;** Apical dendrite; Cluster; Corti-cal column **123**, 473
- Chemokines;** Ageing; Th1; Th2; Granulomas; Cytokines **123**, 313
- Cholesterol;** Dolichol; 3-Hydroxy-3-methyl-glu-taryl CoA reductase; Ageing; Caloric restriction; Rat liver **123**, 1183
- Chromosome transfer;** Cellular senescence; Cell fusion; Complementa-tion; MORF4; Tumor sup-pression **123**, 927
- Citrulline;** Argininosuccinate synthetase; Argini-nosuccinate lyase; Phosphate-dependent glutam-inase; Carbamyl phosphate synthetase-1; Ornithine transcarbamylase **123**, 1159

- Clathrin-dependent endocytosis;** Receptor-mediated endocytosis; Caveolins **123**, 917
- Clk;** *Caenorhabditis elegans*; Ageing; Metabolism; Antioxidant defense **123**, 1447
- clk-2;** *Caenorhabditis elegans*; Lifespan; Telomeres; *rad-5*; Aging **123**, 869
- Cluster;** Apical dendrite; Cerebral cortex; Cortical column **123**, 473
- Co-culture;** Astrocytes; Cell culture; Metabolic impairment; Microglia; Neurons; Thiamine deficiency **123**, 21
- Collagen;** Growth hormone; Aorta; Elastin; Mechanics; Rats **123**, 627
- Complementation;** Cellular senescence; Cell fusion; Chromosome transfer; MORF4; Tumor suppression **123**, 927
- Computer simulations;** Life span; Maximum life span; Gompertz; Longevity QTL; Longevity genes; Genetics of longevity **123**, 131
- Contractility;** Food restriction; Caloric restriction; Cardiac efficiency; Cardiac metabolism; Isolated heart **123**, 1375
- Cord factors;** *Microsporium canis*; *H. pilori*; HP-MP1; Green tea; Morphine **123**, 1655
- Cortical column;** Apical dendrite; Cluster; Cerebral cortex **123**, 473
- Corticosterone;** Zinc; Metallothioneins; Ageing; Inflammation; Thyroid-thymus axis; Thymus grafts; PTU; Stress; MTs transgenic mice; Biological clock; Survival **123**, 675
- CTLA-4;** Aging; Anergy; Immune activation; CD28 **123**, 1419
- Cyclooxygenase-2;** Down syndrome; Lipopolysaccharide; Prostaglandin E₂; Periodontal disease; Real-time PCR **123**, 663
- Cyclophosphamide;** Immunological restoration; Vitamin E; Japanese herbal medicine; Caloric restriction; Vaccine; Grafting of cells and tissues **123**, 1055
- Cytochrome oxidase;** Senescent; Mitochondria; Endothelium **123**, 1363
- Cytokine expression;** Immunosenescence; Neurodegeneration; T lymphocyte subsets; Tyrosine phosphorylation; CD69 expression; Proliferation **123**, 375
- Cytokine;** Longevity; Gene polymorphism **123**, 29
- Cytokines;** Ageing; Th1; Th2; Granulomas; Chemokines **123**, 313
- Cytokines;** Aging; Dendritic cells; Frail elderly **123**, 955
- Cytokines;** Aging; T cell proliferation; CD28; IL-12; IL-15 **123**, 1389
- Cytokines;** Selegiline; Natural Killer cell activity; Norepinephrine; Thymus; Spleen; Lymph nodes; Heart; Hypothalamus **123**, 1065
- Cytokines;** Superoxide dismutase; Catalase; Life span prolongation **123**, 1087
- Cytotoxicity;** Influenza virus; Aging; Memory; Mice **123**, 1167
- DAF-16 transcription factor;** Adaptive response; Aging; Oxidative stress; Life span extension **123**, 1579
- Database;** Aging; Gene; Intervention; Science of aging knowledge environment **123**, 1115
- Deficiency mapping;** Quantitative trait locus mapping; Genotype-environment interaction; Sex-specific effects; Linkage disequilibrium mapping **123**, 95
- Dehydroepiandrosterone;** Aromatase; Osteoblast; Osteoporosis; 1,25-Dihydroxyvitamin D3; Estrogen **123**, 1107
- Dehydroepiandrosterone sulfate;** Anti-aging steroid; Mechanism of action of DHEA **123**, 1101
- Dementia;** Pathogenesis; Neurologic **123**, 1047
- Demographic selection;** Centenarian; Oldest old; Longevity; Genetics; Longevity-enabling gene **123**, 231

- Demography;** Ageing population; Social policies; Older people; Health and Care services; Inter-generational links **123**, 729
- Demography;** Senescence; Evolutionary theory; Networks; Gene expression **123**, 841
- Dendritic cells;** Aging; Frail elderly; Cytokines **123**, 955
- Dentate gyrus;** Adult neurogenesis; MAM; Granule cell number; Newborn cell survival **123**, 1341
- Dentate gyrus;** Postnatal neurogenesis; Neuronal precursors; Methylazoxymethanol **123**, 499
- Development;** Aging; Stem cell; Transplantation; Epithelium; Mammary gland; Cell lineage **123**, 1505
- Development;** Astrocytes; GFAP; Hippocampus; Male; Female; Morphometry; Rat **123**, 481
- Development;** Astroglial cell cultures; Aging; Growth factors; ADP-ribosylation processes **123**, 511
- Development;** Dopamine receptors; Lymphocytes; Frontal cortex; Hippocampus; Striatum; Rat **123**, 491
- DHEA;** Ageing; Lymphocyte subsets; HPA axis; T cell expansions **123**, 1477
- Dietary restriction;** Atherosclerosis; Mouse; Apolipoprotein E **123**, 1121
- Dietary restriction;** Cell proliferation; Percent S-phase cells; Proliferating cell nuclear antigen labeling; Rat **123**, 391
- 1,25-Dihydroxyvitamin D3;** Aromatase; Osteoblast; Osteoporosis; Dehydroepiandrosterone; Estrogen **123**, 1107
- Direct association studies;** Aging and longevity genes; Single nucleotide polymorphism; BRCA1; Two-dimensional gene scanning **123**, 195
- DNA damage;** Alkylating agents; Apoptosis; Cancer; Aging; Mitogen-activated protein kinase (MAPK) **123**, 881
- DNA excision repair;** Ageing; Werner syndrome; Genomic instability; Reactive oxygen species; Antioxidants **123**, 899
- DNA methylation;** Aging; T cells **123**, 1487
- DNA methylation;** ITGAL; LFA-1; T lymphocytes; Aging **123**, 1257
- DNA microarrays;** Caloric restriction; Aging; Gene expression; Muscle; Brain **123**, 177
- DNA polymerase;** Aging; DNA repair; Oxidative damage; 8-Oxo-2'-deoxyguanosine; PCNA **123**, 1521
- DNA repair;** Aging; Oxidative damage; 8-Oxo-2'-deoxyguanosine; DNA polymerase; PCNA **123**, 1521
- DNA repair;** Genomic instability; Human premature aging diseases **123**, 987
- Dolichol;** Cholesterol; 3-Hydroxy-3-methyl-glutaryl CoA reductase; Ageing; Caloric restriction; Rat liver **123**, 1183
- Dopamine receptors;** Development; Lymphocytes; Frontal cortex; Hippocampus; Striatum; Rat **123**, 491
- Dopamine receptors;** Mesenteric vasculature; Aging; Receptor immunohistochemistry; Anti-receptor protein antibodies; Fischer 344 rats **123**, 537
- Down syndrome;** Lipopolysaccharide; Prostaglandin E₂; Periodontal disease; Cyclooxygenase-2; Real-time PCR **123**, 663
- Drosophila;** Lifespan; QTL; Pleiotropy; Sex-specificity; Artificial selection; Recombinant inbred lines **123**, 81
- Drosophila melanogaster;** Longevity; Gene search system; GAL4-UAS system; Mutation **123**, 1531
- Dysregulation;** Replicative senescence; Signal transduction; Receptor tyrosine kinase; G protein-coupled receptor **123**, 1563
- Dystrophin;** Utrophin; Brain; Human fetus; Neuronal cultures **123**, 455

- EBV**; Extremely old; Longevity; Cell lines 123, 1415
- E2F1**; Transcription factor; Alzheimer's disease; Cell cycle; Retinoblastoma protein 123, 11
- Elastin**; Growth hormone; Aorta; Collagen; Mechanics; Rats 123, 627
- Elderberry**; Anthocyanins; Flavonoids; Antioxidant; Pharmacokinetics; Absorption; Elderly 123, 997
- Elderly**; Anthocyanins; Flavonoids; Antioxidant; Pharmacokinetics; Absorption; Elderberry 123, 997
- Endothelium**; Senescent; Apoptosis; Aging; Lung 123, 613
- Endothelium**; Senescent; Mitochondria; Cytochrome oxidase 123, 1363
- Energy restriction**; Reactive oxygen species; Antioxidant; Aging 123, 1597
- Epigenetic gene silencing**; Methylation; Cancer; Ageing; *hMLH1*; Microsatellite instability 123, 1649
- Epithelium**; Aging; Stem cell; Transplantation; Mammary gland; Cell lineage; Development 123, 1505
- ER α** ; Estradiol; ER β ; Aging; Female 123, 593
- ER β** ; Estradiol; ER α ; Aging; Female 123, 593
- ERK**; Receptors; IRS-1; PKB; Transcription factors 123, 603
- Estradiol**; ER α ; ER β ; Aging; Female 123, 593
- Estrogen**; Aromatase; Osteoblast; Osteoporosis; 1,25-Dihydroxyvitamin D3; Dehydroepiandrosterone 123, 1107
- Eucaryotic elongation factor-2**; Ageing heart; Rat cardiac myocytes; Phosphorylated eEF-2; ADP-ribosylation; One-dimensional isoelectric focusing 123, 1305
- Evolutionary biology**; Human progeroid syndromes; Polymorphisms 123, 65
- Evolutionary biology**; Senescence; Fish; Mortality rates; Lifespans 123, 773
- Evolutionary theory**; Senescence; Networks; Demography; Gene expression 123, 841
- Extra-cellular matrix**; Skin; Photodamage; Sun-damage; Senescence; Ageing; AP-1; Metalloproteinase 123, 801
- Extremely old**; EBV; Longevity; Cell lines 123, 1415
- FACS**; CD4⁺ lymphocytes; Ageing phenotype; Mice; Peripheral blood 123, 145
- Fatty acids**; Aging; Free radicals; Protein carbonyls; Malondialdehyde; Protein damage; Carbonyl stress 123, 1437
- Female**; Astrocytes; GFAP; Hippocampus; Development; Male; Morphometry; Rat 123, 481
- Female**; Estradiol; ER α ; ER β ; Aging 123, 593
- Fibroblast**; Ageing; Attractor; Hormesis; Senescence; Stress; Thermodynamics 123, 937
- Fibrosis**; Liver; Aging; Matrix metalloproteinases 123, 413
- Fischer 344 male rats**; Hepatocarcinogenesis; *N*-nitrosodiethylamine 123, 1665
- Fischer 344 rats**; Dopamine receptors; Mesenteric vasculature; Aging; Receptor immunohistochemistry; Anti-receptor protein antibodies 123, 537
- Fischer 344 rats**; Hippocampus; Muscarinic receptors; Ageing; Autoradiography 123, 521
- Fischer 344 rats**; Cerebral arteries; Acetylcholine; Immunohistochemistry; Aging 123, 529
- Fish**; Senescence; Mortality rates; Lifespans; Evolutionary biology 123, 773
- Fixation**; Population genetics; Mutation 123, 851
- Flavonoids**; Anthocyanins; Antioxidant; Pharmacokinetics; Absorption; Elderly; Elderberry 123, 997

Food restriction; Caloric restriction; Contractility; Cardiac efficiency; Cardiac metabolism; Isolated heart **123**, 1375

Forkhead transcriptional factor; Ageing; Apoptosis; Caloric restriction; Cancer; Insulin/IGF-I; Neurodegenerative diseases; Oxidative stress **123**, 245

Frail elderly; Aging; Dendritic cells; Cytokines **123**, 955

Frailty index; Ageing; Rate of mortality; Sex differences; Power-law relationships; Scale invariance **123**, 1457

F344 rat; Substrain difference; Heat shock protein; Heat shock factor; Hepatocyte; Liver **123**, 1605

Free radicals; Aging; Protein carbonyls; Malondialdehyde; Protein damage; Carbonyl stress; Fatty acids **123**, 1437

Free radicals; Melatonin; Aging; Nitrogen-based radicals; Oxygen-based radicals **123**, 1007

French paradox; Red wine polyphenols; Vascular smooth muscle cells **123**, 1033

Frontal cortex; Dopamine receptors; Development; Lymphocytes; Hippocampus; Striatum; Rat **123**, 491

Fungi; *Podospora anserina*; Mitochondria; Oxidative stress; Remodeling; Retrograde response **123**, 755

GAL4-UAS system; *Drosophila melanogaster*; Longevity; Gene search system; Mutation **123**, 1531

Gender; Aging; K_{ATP} channels; Cardioprotection; Heart **123**, 695

Gene; Aging; Database; Intervention; Science of aging knowledge environment **123**, 1115

Gene; Snell dwarf; *Pit1*; Life span; Ageing **123**, 121

Gene expression; Aging; Glucagon receptor; cAMP; AGES; Liver; WAG/Rij rats **123**, 427

Gene expression; Caloric restriction; Aging; DNA microarrays; Muscle; Brain **123**, 177

Gene expression; Mutation; Mitochondrion; Telomere; Ageing **123**, 791

Gene expression; Senescence; Evolutionary theory; Networks; Demography **123**, 841

Gene polymorphism; Longevity; Cytokine **123**, 29

Gene search system; *Drosophila melanogaster*; Longevity; GAL4-UAS system; Mutation **123**, 1531

Genes; T-cells; Immune senescence; Longevity **123**, 963

Genetics; Centenarian; Oldest old; Longevity; Longevity-enabling gene; Demographic selection **123**, 231

Genetics; Natural selection; Longevity; Menopause; Variable environment **123**, 737

Genetics of longevity; Life span; Maximum life span; Gompertz; Longevity QTL; Longevity genes; Computer simulations **123**, 131

Genetics; Variance component analysis; Non-human primates; Aging **123**, 1461

Genome rearrangements; Aging; LacZ reporter genes; Nuclear architecture; Mutations **123**, 907

Genomic instability; Ageing; Werner syndrome; Reactive oxygen species; Antioxidants; DNA excision repair **123**, 899

Genomic instability; DNA Repair; Human premature aging diseases **123**, 987

Genotype-environment interaction; Quantitative trait locus mapping; Sex-specific effects; Deficiency mapping; Linkage disequilibrium mapping **123**, 95

GFAP; Astrocytes; Hippocampus; Development; Male; Female; Morphometry; Rat **123**, 481

GFAP; Astrocytes; S100B; Glutamate uptake; Guanosine; Oxidative stress **123**, 1333

- GFAP**; SHR; Hypertension; Hippocampus; Neurofilament 200 kDa; MAP-2 **123**, 547
- GH deficiency**; Insulin signaling; *Pit1* mutation; Insulin receptor- β ; IRS-2; PI3K; Longevity **123**, 1229
- Glomerular sclerosis**; Kidney disease; Antioxidants; Mesangial cell **123**, 1041
- Glucagon receptor**; Aging; cAMP; AGEs; Gene expression; Liver; WAG/Rij rats **123**, 427
- Glucose**; Akt; Antioxidant; Brain-derived neurotrophic factor; Insulin; Stress **123**, 947
- GluR2/3**; Trigeminal primary sensory neurons; Trigeminal subnucleus caudalis; Immunohistochemistry; Man **123**, 463
- Glutamate uptake**; Astrocytes; GFAP; S100B; Guanosine; Oxidative stress **123**, 1333
- Glutathione**; *Saccharomyces cerevisiae*; Replicative ageing; Catalase; Carbon source **123**, 365
- Glutathione peroxidase**; Aging; 60% oxygen inhalation; Survival; Catalase; Superoxide dismutase; mRNA; Oxidative stress **123**, 1295
- Glutathione S-transferase**; Mouse liver; Age effect; Hepatic response capability; Protein free diet **123**, 1617
- Gompertz**; Life span; Maximum life span; Longevity QTL; Longevity genes; Genetics of longevity; Computer simulations **123**, 131
- Gompertz curve**; Strehler and Mildvan model; Mortality; Adaptation **123**, 637
- Gompertz model**; Mortality; Strehler-Mildvan theory **123**, 827
- G protein-coupled receptor**; Replicative senescence; Signal transduction; Receptor tyrosine kinase; Dysregulation **123**, 1563
- Grafting of cells and tissues**; Immunological restoration; Vitamin E; Cyclophosphamide; Japanese herbal medicine; Cabric restriction; Vaccine **123**, 1055
- Granule cell number**; Adult neurogenesis; Dentate gyrus; MAM; Newborn cell survival **123**, 1341
- Granulomas**; Ageing; Th1; Th2; Chemokines; Cytokines **123**, 313
- Green tea**; Cord factors; *Microsporium canis*; *H. pilori*; HP-MP1; Morphine **123**, 1655
- Growth factors**; Astroglial cell cultures; Development; Aging; ADP-ribosylation processes **123**, 511
- Growth hormone**; Aorta; Collagen; Elastin; Mechanics; Rats **123**, 627
- Growth hormone**; Myocyte nuclei; Left ventricle **123**, 1353
- Guanosine**; Astrocytes; GFAP; S100B; Glutamate uptake; Oxidative stress **123**, 1333
- Health and Care services**; Ageing population; Social policies; Demography; Older people; Intergenerational links **123**, 729
- Heart**; Aging; Gender; K_{ATP} channels; Cardio-protection **123**, 695

- Sex differences**; Ageing; Frailty index; Rate of mortality; Power-law relationships; Scale invariance 123, 1457
- Sex-specific effects**; Quantitative trait locus mapping; Genotype-environment interaction; Deficiency mapping; Linkage disequilibrium mapping 123, 95
- Sex-specificity**; *Drosophila*; Lifespan; QTL; Pleiotropy; Artificial selection; Recombinant inbred lines 123, 81
- SHR**; Hypertension; Hippocampus; Neurofilament 200 kDa; GFAP; MAP-2 123, 547
- Signal transduction**; Replicative senescence; Receptor tyrosine kinase; G protein-coupled receptor; Dysregulation 123, 1563
- Single nucleotide polymorphism**; Aging and longevity genes; Direct association studies; BRCA1; Two-dimensional gene scanning 123, 195
- SIR2**; Aging; Yeast; Heterochromatin; *Caenorhabditis elegans*; Caloric restriction 123, 857
- Skeletal muscle**; Aging; Myoblasts; Myogenic differentiation; Adipogenic differentiation 123, 649
- Skin**; Photodamage; Sun-damage; Senescence; Ageing; AP-1; Extra-cellular matrix; Metalloproteinase 123, 801
- Skin fibroblast**; Mitochondrial DNA; Aging 123, 155
- Snell dwarf**; Insulin signaling; Insulin receptor; IRS-1; PI3K; AKT; Liver 123, 1245

- Snell dwarf; Pit1; Life span; Gene; Ageing** 123, 121
- Social policies; Ageing population; Demography; Older people; Health and Care services; Inter-generational links** 123, 729
- Somatic mutation; Perenniality; Senescence; Resource capture** 123, 747
- Spleen; Selegiline; Cytokines; Natural Killer cell activity; Norepinephrine; Thymus; Lymph nodes; Heart; Hypothalamus** 123, 1065
- Stem cell; Aging; Transplantation; Epithelium; Mammary gland; Cell lineage; Development** 123, 1505
- Steroids; Transcription factors; Ageing; Oxidative stress; Adrenal gland; Bacterial lipopolysaccharide** 123, 1211
- Strehler and Mildvan model; Mortality; Adaptation; Gompertz curve** 123, 637
- Strehler-Mildvan theory; Mortality; Gompertz model** 123, 827
- Stress; Ageing; Attractor; Fibroblast; Hormesis; Senescence; Thermodynamics** 123, 937
- Stress; Akt; Antioxidant; Brain-derived neurotrophic factor; Glucose; Insulin** 123, 947
- Stress; Zinc; Metallothioneins; Ageing; Inflammation; Thyroid-thymus axis; Corticosterone; Thymus grafts; PTU; MTs transgenic mice; Biological clock; Survival** 123, 675
- Striatum; Dopamine receptors; Development; Lymphocytes; Frontal cortex; Hippocampus; Rat** 123, 491
- Substrain difference; F344 rat; Heat shock protein; Heat shock factor; Hepatocyte; Liver** 123, 1605
- Sun-damage; Skin; Photodamage; Senescence; Ageing; AP-1; Extra-cellular matrix; Metalloproteinase** 123, 801
- Superoxide dismutase; Aging; 60% oxygen inhalation; Survival; Catalase; Glutathione peroxidase; mRNA; Oxidative stress** 123, 1295
- Superoxide dismutase; Catalase; Life span prolongation; Cytokines** 123, 1087
- Superoxide dismutase (SOD); Parkinson's disease; Alzheimer's disease; Monoamine oxidase A and B; Acetylcholinesterase; Inhibitors; Propargylamines; Apoptosis; Bcl-2; Rasagiline; TV3326; Neuroprotection** 123, 1081
- Surrogate self; mtLOH; Mutations** 123, 891
- Survival; Aging; 60% oxygen inhalation; Catalase; Glutathione peroxidase; Superoxide dismutase; mRNA; Oxidative stress** 123, 1295
- Survival; Zinc; Metallothioneins; Ageing; Inflammation; Thyroid-thymus axis; Corticosterone; Thymus grafts; PTU; Stress; MTs transgenic mice; Biological clock** 123, 675
- T cell differentiation; Thymus; Castration; Androgens** 123, 401
- T cell expansions; Ageing; Lymphocyte subsets; HPA axis; DHEA** 123, 1477
- T-cell immunity; Aging; Oxidative stress; ZAP-70; Protein tyrosine phosphorylation** 123, 297
- T cell proliferation; Aging; CD28; Cytokines; IL-12; IL-15** 123, 1389
- T cells; Aging; Thymic involution; Recombinant inbred mice; Quantitative trait loci** 123, 1145
- T cells; DNA methylation; Aging** 123, 1487
- T-cells; Genes; Immune senescence; Longevity** 123, 963
- Telomerase; Aging; Telomere length; Keratinocytes** 123, 585
- Telomerase; Senescence; Cancer; Telomere; Cell cycle inhibition; p53; HeLa** 123, 1681
- Telomere; Mutation; Mitochondrion; Gene expression; Ageing** 123, 791
- Telomere; Senescence; Cancer; Telomerase; Cell cycle inhibition; p53; HeLa** 123, 1681
- Telomere length; Aging; Telomerase; Keratinocytes** 123, 585

- Telomeres;** *Caenorhabditis elegans*; Lifespan; *clk-2*; *rad-5*; Aging 123, 869
- Telomere shortening;** Oxidative stress; Mathematical models; Replicative senescence 123, 351
- Th1;** Ageing; Th2; Granulomas; Chemokines; Cytokines 123, 313
- Th2;** Ageing; Th1; Granulomas; Chemokines; Cytokines 123, 313
- Therapeutic interference;** Pathological glia activation; Alzheimer's dementia; Oxidative damage; Amyloid toxicity; Acetylcholine-deficiency; In vitro studies 123, 47
- Thermodynamics;** Ageing; Attractor; Fibroblast; Hormesis; Senescence; Stress 123, 937
- TH gene;** Relative risk; Polymorphism; Longevity 123, 1403
- Thiamine deficiency;** Astrocytes; Cell culture; Co-culture; Metabolic impairment; Microglia; Neurons 123, 21
- Thymic involution;** T cells; Aging; Recombinant inbred mice; Quantitative trait loci 123, 1145
- Thymus;** Selegiline; Cytokines; Natural Killer cell activity; Norepinephrine; Spleen; Lymph nodes; Heart; Hypothalamus 123, 1065
- Thymus;** T cell differentiation; Castration; Androgens 123, 401
- Thymus grafts;** Zinc; Metallothioneins; Ageing; Inflammation; Thyroid-thymus axis; Corticosterone; PTU; Stress; MTs transgenic mice; Biological clock; Survival 123, 675
- Thyroid-thymus axis;** Zinc; Metallothioneins; Ageing; Inflammation; Corticosterone; Thymus grafts; PTU; Stress; MTs transgenic mice; Biological clock; Survival 123, 675
- T lymphocytes;** DNA methylation; ITGAL; LFA-1; Aging 123, 1257
- T lymphocyte subsets;** Immunosenescence; Neurodegeneration; Tyrosine phosphorylation; CD69 expression; Cytokine expression; Proliferation 123, 375
- Transcription factor;** Alzheimer's disease; Cell cycle; Retinoblastoma protein; E2F1 123, 11
- Transcription factors;** Ageing; Oxidative stress; Steroids; Adrenal gland; Bacterial lipopolysaccharide 123, 1211
- Transcription factors;** Receptors; IRS-1; ERK; PKB 123, 603
- Transgenic mouse;** Mutation; Aging; Knockout mouse 123, 1543
- Translational regulation;** Ageing; *Caenorhabditis elegans*; Oxidative stress; Protein turnover 123, 215
- Transmissible spongiform encephalopathies (TSEs) or prion diseases;** Prion protein (PrP^C, PrP^{Sc}); Pathogenic mechanisms; Neurodegeneration; Oxidative stress 123, 1637
- Transmission;** Amyloidosis; Protein folding disease; Ageing 123, 1625
- Transplantation;** Aging; Stem cell; Epithelium; Mammary gland; Cell lineage; Development 123, 1505
- Trigeminal primary sensory neurons;** GluR2/3; Trigeminal subnucleus caudalis; Immunohistochemistry; Man 123, 463
- Trigeminal subnucleus caudalis;** GluR2/3; Trigeminal primary sensory neurons; Immunohistochemistry; Man 123, 463
- Tumor suppression;** Cellular senescence; Cell fusion; Complementation; Chromosome transfer; MORF4 123, 927
- Tunicata;** Aging; Anti-oxidant; Butylated hydroxytoluene; Rejuvenation 123, 1203
- TV3326;** Parkinson's disease; Alzheimer's disease; Monoamine oxidase A and B; Acetylcholinesterase; Inhibitors; Propargylamines; Apoptosis; Bcl-2; Superoxide dismutase (SOD); Rasagiline; Neuroprotection 123, 1081
- Two-dimensional gene scanning;** Aging and longevity genes; Single nucleotide polymorphism; Direct association studies; BRCA1 123, 195

Tyrosine phosphorylation; Immunosenescence; Neurodegeneration; T lymphocyte subsets; CD69 expression; Cytokine expression; Proliferation **123**, 375

Utrophin; Dystrophin; Brain; Human fetus; Neuronal cultures **123**, 455

Vaccine; Immunological restoration; Vitamin E; Cyclophosphamide; Japanese herbal medicine; Caloric restriction; Grafting of cells and tissues **123**, 1055

Variable environment; Natural selection; Longevity; Genetics; Menopause **123**, 737

Variance component analysis; Non-human primates; Genetics; Aging **123**, 1461

Vascular smooth muscle cells; Red wine polyphenols; French paradox **123**, 1033

Vascular tone; Aging; Hypoxia; Reoxygenation; Aorta; Rat **123**, 275

Vitamin E; Immunological restoration; Cyclophosphamide; Japanese herbal medicine; Caloric restriction; Vaccine; Grafting of cells and tissues **123**, 1055

WAG/Rij rats; Aging; Glucagon receptor; cAMP; AGEs; Gene expression; Liver **123**, 427

Werner syndrome; Ageing; Genomic instability; Reactive oxygen species; Antioxidants; DNA excision repair **123**, 899

Yeast; Aging; Heterochromatin; *SIR2*; *Caenorhabditis elegans*; Caloric restriction **123**, 857

Yeast; Prohibitin; *Saccharomyces cerevisiae*; Oxidative stress; Ageing; Mitochondrial proteins **123**, 287

ZAP-70; Aging; Oxidative stress; T-cell immunity; Protein tyrosine phosphorylation **123**, 297

Zinc; Metallothioneins; Ageing; Inflammation; Thyroid-thymus axis; Corticosterone; Thymus grafts; PTU; Stress; MTs transgenic mice; Biological clock; Survival **123**, 675
